

A Very Brief Overview of How I Use The National Standards Report

1. Download the report and save to your computer. The report is available at <http://www.nationalautismcenter.org/nsp/reports.php>
2. After filling out the form, you will have three viewing options. I use the full report, as indicated below:

3. There are several ways to find information about a particular intervention method using the report. You can look in the Table of Contents or search the document for the name of a particular intervention, as pictured below:

Modeling (50 studies) Evidence Level: Established

These interventions rely on an adult or peer providing a demonstration of the target behavior that should result in an imitation of the target behavior by the individual with ASD. Modeling can include simple and complex behaviors. This intervention is often combined with other strategies such as prompting and reinforcement. Examples include live modeling and video modeling.

In the screen above, type the name of the intervention you want to search in the box and click “Enter.” This will take you to the first place in the document that the intervention is listed. Keep clicking the little black arrow (indicated by the red oval) and eventually you will get to the research summary table, as pictured above.
